Adam Bobich

San Carlos, California • www.bobich.us • abobich675@gmail.com

EDUCATION

Masters of Science, Artificial Intelligence Expected June 2027
Oregon State University

Bachelor of Science, Computer Science, AI | GPA: 3.86 Sept. 2026
Oregon State University, Honors College, Dean's List *Corvallis, Oregon*
Relevant Coursework: AI, ML, Operating Systems, Parallel Programming, Networks, Open Source Software

EXPERIENCE

Software Engineer June 2025 - Sept. 2026
BeaverHacks, Oregon State University

- Contributed to technological infrastructure using Next.js + Prisma that scaled the hackathon from 50 participants to 500+, supporting submission and judging workflows for 10,000+ page visitors
- Built 6 team management pages from scratch, implementing full workflows for team creation, browsing, profiles, and invite links that integrated with the platform's submission infrastructure
- Developed admin console, streamlining user management, team oversight, and judge assignment

Undergraduate Developer Researcher Apr. 2025 - July 2025
Charisma Robotics, Oregon State University

- Constructed webpage and animations for Charisma's "CharismaBot," a conversational AI system
- Developed Python middleware to bridge AI backend and frontend using WebSocket communication
- Implemented multi-threaded architecture ensuring responsive user experience during AI processing

Developer Intern June 2022 - June 2023
Bittner Development Group, Redwood City, California

- Programmed interactive content for 9+ Norton textbooks, reaching tens of thousands of students across dozens of universities
- Engineered web features, QA, and DevOps for 20+ interactive chapters using Ruby and React

PROJECTS (Portfolio: www.bobich.us)

Machine Learning 2025 - Present

- Trained and evaluated dozens of models using LeNet & ResNet-18 on MNIST & CIFAR-10 datasets, boosting classification accuracy using augmentation techniques and hyperparameter optimization
- Performed PGD attacks (-65% accuracy) and black-box membership inference attacks (90% accuracy)

Unity Applications 2023 - Present

- Led a 6-person team developing a Unity party game, managing sprint planning and task delegation
- Developed 3 Unity games and 8+ prototypes in C# exploring experimental game mechanics

Web Development 2022 - Present

- Built an algorithmic trading system with strategy creation/optimization & historical-data backtesting
- Developed 2 AI web apps for 24-hour hackathons utilizing Google, Python APIs, and cloud hosting
- Constructed 12+ web applications using Next.js/React and deployed via Vercel and GitHub Pages

Competitions 2025

- Placed first at the Division Two North America Pacific Northwest Regional ICPC competition

SKILLS

Python | C | C# | Java | Next.js | React.js | HTML | JavaScript | OpenGL | SQL | Git
Machine Learning | Web Development | Game Development | Parallel Programming | GPU Programming
